

Cleveland Pick-A-Part is a family owned auto wrecking facility specializing in late model performance vehicles. We are located in Columbia Station, Ohio and have been in business since April of 1986.

We are a Copart Registered Reseller allowing our customers to use us as a portal to the Copart inventory. You can actually bid on any car that Copart is selling in the USA when registered with us.

Why use Cleveland Pick-A-Part as your reseller?

1. Experience- We purchase vehicles daily from Copart and have been doing so for 20 years- we understand how their systems work. We can also offer guidance on hidden damage a vehicle may have based on the auction photos. While we cannot guarantee the extent of damage, we have based our living on the purchase of 1000's of salvage vehicles.
2. Support- We are an auto wrecking facility and can provide the parts to repair your newly purchased salvage vehicle. If we do not have the parts, we can assist you in locating them. Our shipping department currently uses Fed-ex to ship our parts around the world daily. Larger items would ship "crate and freight" on a daily basis using carriers who provide you the safest transport for the best price.
3. Service- We offer numerous additional services to make your purchase as care-free as possible
  - a. Vehicle ownership title transfer
  - b. Ohio state/salvage inspection
  - c. Transportation broker services

At Cleveland Pick-A-Part, we pride ourselves on making the right choices when purchasing salvage vehicles. We have already laid the foundation- our systems are in place. We avoid the pitfalls that will trap other resellers not associated with the salvage automobile industry. You can feel secure in knowing that you are purchasing a vehicle from a group who understands the ins and outs of automotive salvage.
